DETAILED ACTION

Claims 1-20 are currently presented in the instant application according to the Applicant's filing on 03/22/04.

Allowable Subject Matter

1. Claims 1-20 are allowed.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

The closest prior art fails to disclose or fairly suggest:

- a) A clock generation system, in which a redundant clock source device switches between timing signals from first and second hot-swappable oscillator devices in response to oscillator unit removal detected through an interconnect and switches between timing signals in response to timing signal failure, in combination with the remaining claimed limitations, as called for in independent claim 1;
- b) A method of performing clock generation including a step of switching, by a redundant clock source, to a timing signal from another hot-swappable oscillator (HSO) unit for generation of a clock before the respective timing signal from the HSO unit associated with the disconnection becomes unavailable, in combination with the remaining claimed limitations, as called for in independent claim 9; and
- c) A clock generation system, in which a redundant clock source means switches between timing signals from a plurality of hot-swappable oscillator (HSO) means in response to detection of removal of an oscillator unit from a respective interconnect, in combination with the remaining claimed limitations, as called for in independent claim 18.
